

## FOR IMMEDIATE RELEASE

### Vos Glass to Expand with Second Location in Lansing

**LANSING, Mich., July 10, 2020** – Vos Glass, a recognized leader in the West Michigan glazing industry, has announced that it is opening a second location in Lansing to service existing and new customers in the Mid-Michigan area. This expansion comes as a result of the company's commitment to meeting customer needs beyond its original, Grand Rapids' location.

The satellite office will be led by Kenneth Emrich, an industry expert in the areas of project management, estimating, and business development for some of the state's premiere-glazing contractors. During Mr. Emrich's 23 year-long career, he has proven a strong commitment to a modular approach to fabrication and installation and is admired for his 'customers-first' philosophy.

"Ken's proven ability to comprehend both office and field viewpoints, while seamlessly integrating them together, enables our company to not only expand our customer reach but to also expedite installation while reducing project-manpower requirements," said John Turner, Vos Glass Owner and Vice President.

Vos Glass-Grand Rapids currently has residential and service components; Vos Glass-Lansing will be solely focused on commercial glazing projects of all sizes, including small, mid-sized and large. The Grand Rapids location will continue to function as the company's headquarters, containing all company administration and fabrication responsibilities, while the Lansing location will accommodate regional customer demand with its own team of field and office personal.

The new territory will provide Vos Glass more opportunities to collaborate on building envelope projects with its valued partner, Architectural Metals, Inc. (AMI). The partnership between AMI and Vos Glass boasts over 75 skilled-building professionals, an accredited Department of Labor three-year apprenticeship program and a shared passion for developing the next generation of industry tradespeople.

### About Vos Glass
